

VAS892003

TWIN ARM EXTRACTION SYSTEM

CODE: VAS892003

Mobile extractor for welding fumes with cartridge filter and 2 extractor arms as well as increased turbine performance.

Filter for class W3 welding fumes.

Optional activated charcoal cartridge can be used for chemical emissions.

With a welding fumes filter, the machine can be used for: welding fumes from steel and aluminium welding, MIG brazing.

With an activated charcoal filter, the machine can be used for: adhesive smoke from thermal separation of CFRP bonds, adhesive fumes from bonding CFRP components as well as chemical fumes and odours that are given off when processing other plastics in the course of repairs.

The machine can be used with one or two extractor arms depending on the size of the working area.

Technical data

Fan output [m³/h]: 3500

Pressure [Pa]: 2500

Extraction rating [%]: 99.9971

Mains voltage [V/Hz]: 400/50

Power draw [A]: 5.0

Motor output [kW]: 2.2

Noise level [dB(A)]: approx.72

Diameter [mm]: 160

Type of current: 3PH+N+PE

Phone: (02) 9772 9000
